New Generation of Capability and Flexibility

Integrated with compact appearance, cutting-edge technology and intelligent workflow, is to provide more valuable innovation. Its excellent image performance plays an important role in the prevention and early detection in primary medical care, enriching the diagnostic application and enhancing the clinical value.

- 21.5 inch high resolution LCD medical monitor for multi-dimensional viewing angle
- 14 inch high sensitivity touch screen releasing efficient operation at fingertip
- Integrated user interface with ergonomic design
- Built-in batteries for back-up and ultra-long continuous scanning time

Stunning Clarity

Definitive image quality

- High fidelity, high-channel count architecture results in superb detail resolution, particularly at depth
- Tissue Adaptive Imaging (TAI) continuously and automatically optimizes imaging allowing more focus on the patient
 - In B-mode, TAI fine tunes multiple parameters to provide the best possible image quality
 - In Doppler, TAI automatically adjusts for flow state, providing improved continuity, border detection and filling of color
